

Selfship – despatch without leaving your desk!

Selfship is a web based system which simplifies the preparation of the necessary documentation for sending courier shipments nationally and internationally.

Selfship has been developed by the OCS Worldwide IT team in London who believe it to be the most flexible and user-friendly application in the industry. Functionality includes an expanding recipient directory, tracking, tracing, reporting and automated email collection requests.

Selfship allows individual members of a large team to keep track of their despatches without the need for central processing, and immediate information on delivery and status.

Selfship technicians are available to demonstrate the benefits of this flexible system at your location and convenience.

Selfship just requires a PC with at least 32Mb of memory, Internet Explorer v5 or V6, and a plain paper printer. No software needs to be installed on your PC.

To learn more about Self-Ship please browse our user guide at http://www.ocscourier.co.uk/selfship/PDF/Welcome_to_OCS_Selfship.pdf call 0845 678 9800 or email customer.service@ocsworldwide.co.uk
